

PingDirectory Implementation Accelerator Solution

When you deploy PingDirectory as your directory solution, you can feel confident you're backed by Ping Identity's best-in-breed Identity and Access Management (IAM) technology. Add our extensive knowledge and best practices gained through hundreds of successful deployments, and you are well on your way to success.

Combining our world class software and implementation expertise, the PingDirectory Implementation Accelerator solution is a proven process to help you rapidly realize benefits from your investment in Ping. In addition to accelerating your time to value, you'll rest easier knowing you're supported by experts who can help you:

- Ease design and accelerate your implementation
- Mitigate risk
- Achieve your business objectives

WHAT'S INCLUDED?

PHASE 1 DESIGN

- We kick off your Design phase with a focused onsite workshop to capture your detailed use cases and requirements.
- The workshop is followed by close collaboration with your team to arrive at an agreed-upon architecture and design that will become the blueprint for your implementation and a project plan to reach an ideal future state, without disrupting production processes.

PHASE 2 IMPLEMENT

- Using the agreed upon design we will lead the implementation of PingDirectory in up to three environments plus one Disaster Recovery instance.
- Your team will be working with us every step of the way to build knowledge and set them up for long term success.

PHASE 3 VALIDATE

- Working closely with your Performance Test Team the implemented system will undergo stability testing and environment tuning in preparation for the introduction of your initial set of LDAP sources.

PHASE 4 INTEGRATE

- Our team along with your IAM and application integration teams will complete the connection of up to twelve out-of-the-box LDAP sources into the validated environment.
- To assist you with future PingDirectory integrations you will also receive configurations of service accounts and application specific configuration settings.

PHASE 5 LAUNCH

- When your new environment is ready to go live we will complete our coaching and enablement of your IAM Team on implemented solution, complete with transition materials, technical references, and points of contact at Ping.
- We will also remain engaged for the first week of operation to provide dedicated assistance for your team to help the launch go smoothly.

ADD-ON PingDataSync Supported Application

- If you would like to sync Active Directory to PingDirectory, you can add the configuration of this product to the engagement for an additional fee (some restrictions apply)

ADD-ON PingProxy

- If you would like to deploy PingProxy, you can add the configuration of this product to the engagement for an additional fee (some restrictions apply)
